The technology portal of Azerbaijan 2009

Authors: Murad Imanbayli

Courses

Software Developer

IT Solutions,

First aid

Independent Coursework

Harvard University Computer Science CS50 online

Android App Development on Lynda.com

Projects

Baku JUG -Baku Java Users Group

February 2013 to Present

Members: Murad Imanbayli, Ilkin Abdullayev, Jalil Babazade

This group is established to gather all students, employees, and academics who use Java. We frequently organize meetings in order to gather them all, exchange our knowledge, and get to know each other. If you want to contact us, please feel free to email us. <http://www.iouc.org/p/cm/ld/fid=47®ion=61&gid=649>

2 people have recommended Murad

"Murad has very good understanding of OOP design and implementation. Within a month he managed not only to learn the project which was written before him, but also advanced the project with ad-dons. He is fast learner and good teammate. The project we were working on boosted after he joined us."

— **Ali Ismayilov**, worked directly with Murad at IT Solutions,

"I've been CEO at Digital Source LLC since 2005, and even promoted Murad to the role of Senior Software Engineer last year. Murad has proven to be a reliable employee with excellent communication skills. He is well respected by other members of our team. Murad is a fast learner and has excellent problem solving abilities. Besides has excellent on database, and has perfect skills on java software development language. He created some additional applications for our daily activities which helped us to minimize our dayli organizational time. Although I will be disappointed to lose Murad as an employee, I am happy to recommend him in case if he will decide to continue his carrier outside our company. If you'd like more information, please do not hesitate to contact me."

— **Jalil Babazade**, managed Murad at Digital Source LLC
